TAKE BACK YOUR YARD AND YOUR PEACE OF MIND WITH

MosquitoNix™

Gail and Owen McCrory have a one-acre yard with a creek flowing through it, but they'd never been able to entertain in their lush setting because of mosquitoes. Gail, a landscape supervisor at the Dallas Country Club for more than 25 years, had strong feelings about doing things organically. She was excited to learn about the MosquitoNix system, an automated misting system that uses a mist of a natural flower extract, among other options. "I know it works," remarked Owen. "The yardman inadvertently unplugged the unit and within a few days the mosquitoes were back."

"It's a guaranteed solution to your mosquito problem," says John Stubbs, co-founder of MosquitoNix. MosquitoNix has discovered an effective way to control unwanted pests like mosquitoes.

How is MosquitoNix Different?

Thousands of mosquito control products have been used in the past in various forms — lotions, gels, pump sprays, candles, yard bombs and propane devices, etc. Some, like DEET, don't kill the mosquitoes but merely repel them. Others are merely topical. Until MosquitoNix, with its uniquely designed system, none really solved the problem.

MosquitoNix uses a digital, totally automated system to deliver conventional pest products (customers can also choose more natural options) that eliminate mosquito activity.

When hiring a mosquito misting company, there are some questions to ask. Is the company licensed through the Structural Pest Control Board of Texas? Do they offer a custom high-tech remote control with an adequate range? Does the unit have flexible programming from day to day, and spray to spray, with a system "on" and "off" feature? Do they offer a complete pest-management program? MosquitoNix offers these advantages and more.

"Mosquito control is what we do. Our professionals will evaluate the specific needs of your home or business, provide a customized system layout and an estimate of the cost. We will install it, and maintain and service it throughout the year," Stubbs says. "Every member of the MosquitoNix installation and service staff is thoroughly trained and fully certified. We do not use subcontractors and all lead technicians are licensed by the Structural Pest Control Board of Texas."

They also offer a great warranty with a 90-day money-back guarantee. One customer commented, "The 24-hour service promise sold me. If I call at 7 p.m. on Thursday, they'll be here before 7 p.m. on Friday to make sure everything's fine."

MosquitoNix has an entomologist and horticulturalist on staff to support the company's vision of becoming the national leader in mosquito management

solutions. Their staff focuses on aggressively researching the ever-changing mosquito population of the communities they serve.

How Does the System Work?

The MosquitoNix misting system is a technologically advanced and engineered mosquito-control system that is effective and 100 percent guaranteed to help protect you and your family by eliminating the mosquito population in your yard.

The system is a digitally operated automated unit. The MosquitoNix misting system will typically spray two to 4 times a day at 30-to 45-second intervals. Nozzles are located around the perimeter of the yard, allowing the system to spray

around a vast area of mosquito breeding activity. Within two weeks of your installation, you and your family will once again be able to enjoy the comforts of your own yard. In addition, MosquitoNix makes sure your system always operates properly through periodic diagnostic evaluations.

What customers are saying about MosquitoNix:

"For the past nine years, I have lived on Lakeside Drive in Highland Park. Rarely have I been able to spend time on my front porch or around the pool because we would get eaten up by mosquitoes. They controlled me. Once we had the MosquitoNix Mist System installed, our problems were totally solved. The service promise was kept and the system was installed to my specifications. Thanks to MosquitoNix, I have regained control of my yard."

— Newt Walker, Dallas/Fort Worth

"Once in a while you find something that works and you really want to share it with your friends. We recently had the MosquitoNix System installed in our new home. Tubing with copper risers was installed around the perimeter and eaves of our home. The system is set to spray 3 times a day for just 45 seconds and just as they say at MosquitoNix, 'No More Mosquitoes. Period!' We have some great areas outside that we can now enjoy mosquito-free. Our landscaper was so impressed, he wants one for his home and is going to recommend MosquitoNix to his customers!"

— Elysia Ragusa, Dallas/Fort Worth

Why Use MosquitoNix for Pest Control?

Imagine a garden wedding where you are able to set up the gazebo and tables for outdoor dining in total comfort with no bug bites. When you plan your next big outdoor party or family gathering, give MosquitoNix a call and take advantage of the one-time outdoor application that will give you added peace of mind.

MosquitoNix also offers other products and services such as a regularly scheduled monthly

mosquito treatment program. Similar to a lawn maintenance program but targeting the elimination of mosquitoes. In addition, they offer a customized interior and exterior pest service treatment plan covering pests such as: Ants, Fleas, Gnats, Roaches, Wasps, Earwigs, Silverfish, Crickets and Spiders. Rodent control is also available. You can trust the professional staff at MosquitoNix to offer services that fit your family's lifestyle.

"People spend a lot of money landscaping and fixing up their backyard. It's a shame not to be able to use it in the spring and summer months when your family wants to grill on the patio or sit around the pool. We're giving you your yard back," Stubbs remarked.

The corporate office in Dallas is located at 14282 Gillis Road, with franchises operating in Houston and San Antonio, as well as other major cities in the United States. For more information on how you can have a MosquitoNix system installed on your property, call 972.934.2000, or go to www.mosquitonix.com. The friendly and knowledgeable staff will be happy to set an appointment for a free consultation.
